

Testimonial from Jan Horne, December 2011

I am so happy to be able to smile naturally for the first time in over forty years. After meeting Celia and her team and sheepishly asking if anything could be done to my front teeth, she has actually made my year.

Celia took over from my old dentist who had retired. After years of trying to keep my teeth, because of gum problems, she has turned my dental hygiene around. The dental hygienist has showed me how to keep my gums in as good order as I can. Because I was keeping them in much better shape, Celia redesigned my front teeth and they are beautiful. I smile at everybody now instead of putting my hands in front of my mouth.

Celia put so much effort in helping me, she made sure they were 100% perfect and she took delight in making me happy.

I cannot recommend Celia and her friendly, helpful team enough. I have always been afraid of the dentist chair but not anymore. I am now going to have a big family photo taken and guess who is at the forefront with a great big smile.

If you would like the same treatment, don't hesitate, see Celia and her team. You won't regret it, whatever your age.
